Chapter 5

The Challenges of Starting a Business

Build a Better Baby and They Will Come

One balmy San Diego evening in 1993, Mary and Rick Jurmain were watching a TV program about teenage pregnancy. This vignette is based on the following sources: Realityworks Inc., “About Us,” *Realityworks*, <http://www.realityworks.com/aboutus.html> (accessed October 4, 2008); Realityworks Inc., “RealCare Baby,” *Realityworks* (2008), <http://www.realityworks.com/realcare/realcarebaby.html> (accessed October 4, 2008); “Realityworks Infant Simulator and RealCare Parenting Program,” *Horizons Solutions Site* (August 17, 2007), http://www.solutions-site.org/artman/publish/article_47.shtml (accessed October 4, 2008); Brenda Bredahl, “Bringing Up Baby,” *BNET.com*, Corporate Report Wisconsin, January 2004, http://findarticles.com/p/articles/mi_qa5426/is_/ai_n21343525 (accessed October 7, 2008); “Have a Baby? I Think I’ll Think It Over,” *Horizons Solutions Site* (1998), http://www.solutions-site.org/kids/stories/KScat3_sol72.htm (accessed October 4, 2008); “Baby’ Helps Teens Think It Over!” *Education World*, May 25, 1998, http://www.education-world.com/a_curr/curr077.shtml (accessed October 6, 2008); Kate Stone Lombardi, “Doll Gives a Taste of Real Life,” *New York Times*, May 24, 1998, <http://query.nytimes.com/gst/fullpage.html?res=9B05E3DC1231F930A3575BC0A962958260> (accessed October 6, 2008); J. F. L., MD, “Dolls from Hell,” *Pediatrics* 97, no. 3 (March 1996), <http://pediatrics.aapublications.org/cgi/content/abstract/97/3/317> (accessed October 6, 2008); Deborah L. Cohen, “Bringing Up Baby,” *Education Week*, November 16, 1994, <http://www.edweek.org/ew/articles/1994/11/16/11baby.h14.html> (accessed October 6, 2008); “This Doll Tells the Young to Hold Off,” *New York Times*, August 3, 1994, <http://query.nytimes.com/gst/fullpage.html?res=9B05E3DC1231F930A3575BC0A962958260> (accessed October 6, 2008). To simulate the challenge of caring for an infant, teens on the program were assigned to tend baby-size sacks of flour. Rick, a father of two young children, remarked that trundling around a sack of flour wasn’t exactly a true-to-life experience. In particular, he argued, sacks of flour simulated only abnormally happy babies—babies who didn’t cry, especially in the middle of the night. Half-seriously, Mary suggested that her husband—a between-jobs aerospace engineer—build a better baby, and within a couple of weeks, a prototype was born. Rick’s brainchild was a bouncing 6.5-pound bundle of vinyl-covered joy with an internal computer to simulate infant crying at realistic, random intervals. He also designed a drug-affected model to simulate

tremors from withdrawal, and each model monitored itself for neglect or ill treatment.

The Jurmains patented Baby Think It Over (aka BTIO) and started production in 1994 as Baby Think It Over Inc. Their first “factory” was their garage, and the “office” was the kitchen table—“a little business in a house,” as Mary put it. With a boost from articles in *USA Today*, *Newsweek*, *Forbes*, and *People*—plus a “Product of the Year” nod from *Fortune*—news of the Jurmains’ “infant simulator” eventually spread to the new company’s targeted education market, and by 1998, some forty thousand simulators had been babysat by more than a million teenagers in nine countries. By that time, the company had moved to Wisconsin, where it had been rechristened BTIO Educational Products Inc. to reflect an expanded product line that now includes not only dolls and equipment, like the Shaken Baby Syndrome Simulator, but also simulator-based programs like ySTART Addiction Education and Realityworks Pregnancy Profile. BTIO was retired and replaced by the new and improved RealCare Baby and, ultimately, by RealCare Baby II—*plus*, which requires the participant to determine what the “baby” needs when it cries and downloads data to record mishaps (such as missed-care events) and misconduct (like baby shaking). If RealCare Baby II—*plus* shows signs of fatigue, you can plug him or her into the nearest wall outlet. In 2003, the name of the Jurmains’ company was changed once again, this time to Realityworks Inc. The change, explains the company Web site, reflects its decision “to focus on what the company does best—providing realistic learning experiences.”

5.1 What Is an Entrepreneur?

LEARNING OBJECTIVES

1. Define *entrepreneur*.
2. Describe the three characteristics of entrepreneurial activity.
3. Identify five potential advantages to starting your own business.
4. Explain the differences among three types of start-up firms.

In developing BTIO and Realityworks Inc., the Jurmains were doing what entrepreneurs do (and doing it very well). In fact, Mary was nominated three times for the Ernst & Young Entrepreneur of the Year Award and named 2001 Wisconsin Entrepreneurial Woman of the Year by the National Association of Women Business Owners. So what, exactly, is an *entrepreneur*? What does an entrepreneur do? According to one definition, an entrepreneur is an “individual who starts a new business,” and that’s true as far as it goes. Another definition identifies an entrepreneur as someone who uses “resources to implement innovative ideas for new, thoughtfully planned ventures,” Canadian Foundation for Economic Education, “Glossary of Terms,” *Mentors, Ventures & Plans* (2008), <http://www.mvp.cfee.org/en/glossary.html> (accessed October 7, 2008). which is also true as far as it goes. But an important component of a satisfactory definition is still missing. To appreciate fully what it is, let’s go back to the story of the Jurmains, for whom entrepreneurship seems to have worked out quite well. We hasten to point out that, in 1993, the Jurmains were both unemployed—Rick had been laid off by General Dynamics Corp., and Mary by the San Diego Gas and Electric Company. While they were watching the show about teenagers and flour sacks, they were living off a loan from her father and the returns from a timely investment in coffee futures. Rick recalls that the idea for a method of creating BTIO came to him while “I was awake in bed, worrying about being unemployed.” He was struggling to find a way to feed his family. He had to make the first forty simulators himself, and at the end of the first summer, BTIO had received about four hundred orders—a promising start, perhaps, but, at \$250 per baby (less expenses), not exactly a windfall. “We were always about one month away from bankruptcy,” recalls Mary.

At the same time, it’s not as if the Jurmains started up BTIO simply because they had no “conventional” options for improving their financial prospects. Rick, as we’ve seen, was an aerospace engineer, and his résumé includes work on space-shuttle missions at NASA. Mary, who has not only a head for business but also a degree in industrial engineering, has worked at the Johnson Space Center. Therefore, the idea of replacing a sack of flour with a computer-controlled

simulator wasn't necessarily rocket science for the couple. But taking advantage of that idea—choosing to start a new business and to commit themselves to running it—was a risk. *Risk taking* is the missing component that we're looking for in a definition of *entrepreneurship*, and so we'll define an **entrepreneur**¹ as someone who identifies a business opportunity and assumes *the risk of creating and running a business* to take advantage of it.

The Nature of Entrepreneurship

If we look a little more closely at the definition of entrepreneurship, we can identify three characteristics of entrepreneurial activity: Adapted from Marc J. Dollinger, *Entrepreneurship: Strategies and Resources*, 3rd ed. (Upper Saddle River, NJ: Prentice Hall, 2003), 5–7.

1. *Innovation*. Entrepreneurship generally means offering a new product, applying a new technique or technology, opening a new market, or developing a new form of organization for the purpose of producing or enhancing a product.
2. *Running a business*. A *business*, as we saw in [Chapter 1 "The Foundations of Business"](#), combines resources to produce goods or services. Entrepreneurship means setting up a business to make a profit.
3. *Risk taking*. The term *risk* means that the outcome of the entrepreneurial venture can't be known. Entrepreneurs, therefore, are always working under a certain degree of *uncertainty*, and they can't know the outcomes of many of the decisions that they have to make. Consequently, many of the steps they take are motivated mainly by their confidence in the innovation and in their understanding of the business environment in which they're operating.

It isn't hard to recognize all three of these characteristics in the entrepreneurial experience of the Jurmains. They certainly had an *innovative* idea. But was it a *good* business idea? In a practical sense, a "good" business idea has to become something more than just an idea. If, like the Jurmains, you're interested in generating income from your idea, you'll probably need to turn it into a *product*—something that you can market because it satisfies a need. If—again, like the Jurmains—you want to develop a product, you'll need some kind of organization to coordinate the resources necessary to make it a reality (in other words, a *business*). Risk enters the equation when, like the Jurmains, you make the decision to start up a business and when you commit yourself to managing it.

1. Individual who identifies a business opportunity and assumes the risk of creating and running a business to take advantage of it.

A Few Things to Know about Going into Business for Yourself

So what about you? Do you ever wonder what it would be like to start your own business? Maybe you want to try your hand at entrepreneurship. You could be the next Larry Page or Sergey Brin, cofounders of Google. Or the next David Marcks, a golf course manager who came up with the idea of Geese Police—training dogs to chase geese from golf courses, corporate parks, and municipal playgrounds. Isabel M. Isidro, “Geese Police: A Real-Life Home Business Success Story,” *PowerHomeBiz.com* (2008), <http://www.powerhomebiz.com/OnlineSuccess/geesepolice.htm> (accessed August 31, 2011). Or even the next Pierre Omidyar, the French-born software developer who built an online venue for person-to-person auctions, known as eBay. See American Academy of Achievement, “Pierre Omidyar,” *Academy of Achievement* (November 9, 2005), <http://www.achievement.org/autodoc/page/omi0bio-1> (accessed October 8, 2008).

Figure 5.1

Mark Zuckerberg founded Facebook while a student at Harvard and, by age 27, has built up a personal wealth of \$13.5 billion.

Source:
http://commons.wikimedia.org/wiki/File:Facebook_Press_Conference_4.jpg

You might even turn into a “serial entrepreneur” like Marcia Kilgore. Encyclopedia of World Biography, s.v. “Marcia Kilgore: Entrepreneur and spa founder,” <http://www.notablebiographies.com/newsmakers2/2006-Ei-La/Kilgore-Marcia.html> (accessed August 29, 2011). After high school, she moved from Canada to New York City to attend Columbia University. But when her financial aid was delayed, she abandoned her plans to attend college and took a job as a personal trainer (a natural occupation for a former bodybuilder and middleweight title holder). But things got boring in the summer when her wealthy clients left the city for the Hamptons. To keep busy, she took a skin care course at a Manhattan cosmetology institute. As a teenager, she was self-conscious about her bad complexion and wanted to know how to treat it herself. She learned how to give facials and work with natural remedies. Her complexion improved, and she started giving facials to her fitness clients who were thrilled with the results. As demand for her services exploded, she started her first business—Bliss Spa—and picked up celebrity clients, including Madonna, Oprah Winfrey, and Jennifer Lopez. The business went international, and she sold it for more than \$30 million. Jessica Bruder, “The Rise Of The Serial Entrepreneur,” *Forbes*, August 12, 2010, http://www.forbes.com/2010/08/12/serial-entrepreneur-start-up-business-forbes-woman-entrepreneurs-management_3.html (accessed August 29, 2011).

But the story doesn't end here; she didn't just sit back and enjoy her good fortune. Instead, she launched two more companies: Soap and Glory, a supplier of affordable beauty products sold at Target, and FitFlops, which sells sandals that tone and tighten your leg muscles as you walk. And by the way, remember how Oprah loved Kilgore's skin care products? She also loves Kilgore's sandals and plugged them on her talk show. You can't get a better endorsement than that. Kilgore never did finish college, but when asked if she would follow the same path again, she said, "If I had to decide what to do all over again, I would make the same choices...I found by accident what I'm good at, and I'm glad I did."

For the sake of argument, let's say that you would like to know a little more about going into business for yourself—in which case, you'll want some answers to questions like the following:

- Should I start a business?
- What are the advantages and disadvantages of starting a business?
- How do I come up with a business idea?
- Should I build a business from scratch, buy an existing business, or invest in a franchise?
- How do I go about planning a business?
- What steps are involved in developing a business plan?
- Where would I find help in getting my business started and operating it through the start-up phase?
- How can I increase the likelihood that I'll succeed?

In this chapter, we'll provide some answers to questions like these.

Why Start Your Own Business?

Let's say that you are interested in the idea of going into business for yourself. Not everyone, of course, has a desire to take the risks and put in the work involved in starting up a business. What sort of characteristics distinguishes those who do from those who don't want to start a business? Or, more to the point, why do some people actually follow through on the desire to start up their own businesses? According to the **Small Business Administration (SBA)**², a government agency that provides assistance to small businesses, the most common reasons for starting a business are the following: U.S. Small Business Administration, "First Steps: How to Start a Small Business," <http://www.sba.gov/starting/indexsteps.html> (accessed April 21, 2006).

2. Government agency that helps prospective owners set up small businesses, obtain financing, and manage ongoing operations.

- To be your own boss
- To accommodate a desired lifestyle

- To achieve financial independence
- To enjoy creative freedom
- To use your skills and knowledge

The Small Business Administration points out, though, that these are likely to be advantages only “for the right person.” And how do you know if you’re one of the “right people”? The SBA suggests that you assess your strengths and weaknesses by asking yourself a few relevant questions: U.S. Small Business Administration, “Is Entrepreneurship for You?” <http://www.sba.gov/content/entrepreneurship-you> (accessed August 31, 2011).

- *Am I a self-starter?* You’ll need to develop and follow through on your ideas. You’ll need to be able to organize your time.
- *How well do I get along with different personalities?* You’ll need to develop working relationships with a variety of people, including unreliable vendors and sometimes cranky customers.
- *How good am I at making decisions?* You’ll be making decisions constantly—often under pressure.
- *Do I have the physical and emotional stamina?* Can you handle six or seven workdays of as long as twelve hours every week?
- *How well do I plan and organize?* If you can’t stay organized, you’ll get swamped by the details. In fact, poor planning is the culprit in most business failures.
- *Is my drive strong enough?* You’ll need to be highly motivated to withstand bad periods in your business, and simply being responsible for your business’s success can cause you to burn out.
- *How will my business affect my family?* Family members need to know what to expect before you begin a business venture, such as financial difficulties and a more modest standard of living.

Later in this chapter, we’ll take up the question of why businesses fail, but since we’re still talking about the pros and cons of starting a business in the first place, we should consider one more issue: in addition to the number of businesses that start and then fail, a huge number of business ideas never even make it to the grand opening. One business analyst cites four reservations (or *fears*) that prevent people from starting businesses: Shari Waters, “Top Four Reasons People Don’t Start a Business,” *About.com*, http://retail.about.com/od/startingaretailbusiness/tp/overcome_fears.htm (accessed October 8, 2008).

- *Money.* Granted, without the cash, you can’t get very far. *What to do:* Conduct some research to find out where funding is available.

- *Security.* A lot of people don't want to sacrifice the steady income that comes with the nine-to-five job. *What to do:* Don't give up your day job. At least at first, think about hiring someone to run your business while you're gainfully employed elsewhere.
- *Competition.* A lot of people don't know how to distinguish their business ideas from similar ideas. *What to do:* Figure out how to do something cheaper, faster, or better.
- *Lack of ideas.* Some people simply don't know what sort of business they want to get into. *What to do:* Find out what trends are successful. Turn a hobby into a business. Think about a franchise.

If you're still interested in going into business for yourself, feel free to regard these potential drawbacks as mere obstacles to be overcome by a combination of planning and creative thinking.

Distinguishing Entrepreneurs from Small Business Owners

Though most entrepreneurial ventures begin as small businesses, not all small business owners are entrepreneurs. Entrepreneurs are innovators who start companies to create new or improved products. They strive to meet a need that's not being met, and their goal is to grow the business and eventually expand into other markets.

In contrast, many people either start or buy small businesses for the sole purpose of providing an income for themselves and their families. They do not intend to be particularly innovative, nor do they plan to expand significantly. This desire to operate is what's sometimes called a "lifestyle business." Kathleen Allen, *Entrepreneurship for Dummies* (New York: Wiley, 2001), 14. The neighborhood pizza parlor or beauty shop, the self-employed consultant who works out of the home, and even a local printing company—all of these are typical lifestyle businesses. In [Section 5.2 "The Importance of Small Business to the U.S. Economy"](#), we discuss the positive influences that both lifestyle and entrepreneurial businesses have on the U.S. economy.

Figure 5.2

These bakers are not entrepreneurs. They run their small bakery for the sole purpose of providing an income for themselves and their families (a salary-substitute firm) or to earn a living while pursuing their hobby of baking (a lifestyle firm).

KEY TAKEAWAYS

- An **entrepreneur** is someone who identifies a business opportunity and assumes the risk of creating and running a business to take advantage of it.
 - There are three characteristics of entrepreneurial activity:
 1. *Innovating*. An entrepreneur offers a new product, applies a new technique or technology, opens a new market, or develops a new form of organization for the purpose of producing or enhancing a product.
 2. *Running a business*. Entrepreneurship means setting up a business to make a profit from an innovative product or process.
 3. *Risk taking*. Risk means that an outcome is unknown. Entrepreneurs, therefore, are always working under a certain degree of uncertainty, and they can't know the outcomes of many of the decisions that they have to make.
 - According to the **SBA**, a government agency that provides assistance to small businesses, there are five advantages to starting a business—"for the right person":
 1. Be your own boss.
 2. Accommodate a desired lifestyle.
 3. Achieve financial independence.
 4. Enjoy creative freedom.
 5. Use your skills and knowledge.
 - To determine whether you're one of the "right people" to exploit the advantages of starting your own business, the SBA suggests that you assess your strengths and weaknesses by asking yourself the following questions:
 1. Am I a self-starter?
 2. How well do I get along with different personalities?
 3. How good am I at making decisions?
 4. Do I have the physical and emotional stamina?
 5. How well do I plan and organize?
 6. Is my drive strong enough?
 7. How will my business affect my family?

- Though most entrepreneurial ventures begin as small businesses, not all small business owners are entrepreneurs. Entrepreneurs are innovators who start companies to create new or improved products. In contrast, many people start businesses for the purpose of providing an income for themselves and their families. This type of businesses is sometimes called a “lifestyle business.”

EXERCISE

(AACSB) Analysis

Do you have what it takes to be an entrepreneur? To find out, start by reviewing the following list of characteristics commonly attributed to entrepreneurs:

- They are creative people who sometimes accomplish extraordinary things because they’re passionate about what they’re doing.
- They are risk-taking optimists who commit themselves to working long hours to reach desired goals.
- They take pride in what they’re doing and get satisfaction from doing something they enjoy.
- They have the flexibility to adjust to changing situations to achieve their goals.

We’ll also add that entrepreneurs usually start small. They begin with limited resources and build their businesses through personal effort. At the end of the day, their success depends on their ability to manage and grow the organization that they created to implement their vision.

Now use the following three-point scale to indicate the extent to which each of these attributes characterizes you:

1. It doesn’t sound like me.
2. It sounds like me to a certain extent.
3. It sounds a lot like me.

Based on your responses, do you think that you have the attributes of an entrepreneur? Do you think you could be a successful entrepreneur? Why, or why not?

5.2 The Importance of Small Business to the U.S. Economy

LEARNING OBJECTIVES

1. Define a *small business*.
2. Explain the importance of small businesses to the U.S. economy.
3. Explain why small businesses tend to foster innovation more effectively than large ones.
4. Describe some of the ways in which small companies work with big ones.

What Is a “Small Business”?

To assess the value of small businesses to the U.S. economy, we first need to know what constitutes a small business. Let’s start by looking at the criteria used by the Small Business Administration. According to the SBA, a **small business**³ is one that is independently owned and operated, exerts little influence in its industry, and (with a few exceptions) has fewer than five hundred employees. “What is SBAs Definition of a Small Business Concern?,” U.S. Small Business Administration, <http://www.sba.gov/content/what-sbas-definition-small-business-concern>, (accessed August 28, 2011).

Why Are Small Businesses Important?

Small business constitutes a major force in the U.S. economy. There are more than twenty-seven million small businesses in this country, and they generate about 50 percent of our gross domestic product (GDP). Office of Advocacy, U.S. Small Business Administration, *The Small Business Economy: A Report to the President*, Appendix A (December 2010), <http://www.sba.gov/content/small-business-economy-2010> (accessed August 28, 2011). The millions of individuals who have started businesses in the United States have shaped the business world as we know it today. Some small business founders like Henry Ford and Thomas Edison have even gained places in history. Others, including Bill Gates (Microsoft), Sam Walton (Wal-Mart), Steve Jobs (Apple Computer), Michael Dell (Dell, Inc.), Steve Case (AOL), Pierre Omidyar (eBay), and Larry Page and Sergey Brin (Google), have changed the way business is done today. Still millions of others have collectively contributed to our standard of living.

3. According to the SBA, a business that is independently operated, exerts little influence in its industry, and employs fewer than five hundred people.

Aside from contributions to our general economic well-being, founders of small businesses also contribute to growth and vitality in specific areas of economic and socioeconomic development. In particular, small businesses do the following:

- Create jobs
- Spark innovation
- Provide opportunities for many people, including women and minorities, to achieve financial success and independence

In addition, they complement the economic activity of large organizations by providing them with components, services, and distribution of their products.

Let's take a closer look at each of these contributions.

Job Creation

The majority of U.S. workers first entered the business world working for small businesses. Today, half of all U.S. adults either are self-employed or work for businesses with fewer than five hundred employees. "How Important Are Small Businesses to the U.S. Economy?" U.S. Small Business Administration, Office of Advocacy, <http://www.sba.gov/advocacy/7495/8420>, (accessed August 28, 2011). Although the split between those working in small companies and those working in big companies is about even, small firms hire more frequently and fire more frequently than do big companies. Brian Headd, "An Analysis of Small Business and Jobs," U.S. Small Business Administration, Office of Advocacy, <http://archive.sba.gov/advo/research/rs359tot.pdf> (accessed August 30, 2011). Why is this true? At any given point in time, lots of small companies are started and some expand. These small companies need workers and so hiring takes place. But the survival and expansion rates for small firms is poor, and so, again at any given point in time, many small businesses close or contract and workers lose their jobs. Fortunately, over time more jobs are added by small firms than are taken away, which results in a net increase in the number of workers. **Table 5.1 "Small Firm Job Gains and Losses, 1993–2008 (in millions of jobs)"** reports the net increase in jobs generated by small firms for the fifteen-year period of 1993 to 2008 and breaks it down into job gains from openings and expansions and job losses from closings and contractions.

Table 5.1 Small Firm Job Gains and Losses, 1993–2008 (in millions of jobs)

	Job Gains From		Job Losses From	
Net Change	Openings	Expansions	Closings	Contractions

	Job Gains From		Job Losses From	
20.7	105.2	398.3	97.7	385.1

The size of the net increase in the number of workers for any given year depends on a number of factors, with the economy being at the top of the list. A strong economy encourages individuals to start small businesses and expand existing small companies, which adds to the workforce. A weak economy does just the opposite: discourages start-ups and expansions, which decreases the workforce through layoffs. Table 5.1 "Small Firm Job Gains and Losses, 1993–2008 (in millions of jobs)" reports the job gains from start-ups and expansions and job losses from business closings and contractions.

Innovation

Given the financial resources available to large businesses, you'd expect them to introduce virtually all the new products that hit the market. According to the SBA, small companies develop more patents per employee than do larger companies. During a recent four-year period, large firms generated 1.7 patents per hundred employees, whereas small firms generated an impressive 26.5 patents per employee. Anthony Breitzman and Diana Hicks, "An Analysis of Small Business Patents by Industry and Firm Size, Office of Advocacy, Small Business Administration," U.S. Small Business Administration, <http://archive.sba.gov/advo/research/rs335tot.pdf>, (accessed August 30, 2011). Over the years, the list of important innovations by small firms has included the airplane and air-conditioning, the defibrillator and DNA fingerprinting, oral contraceptives and overnight national delivery, the safety razor, strobe lights, and the zipper. William J. Baumol, "Small Firms: Why Market-Driven Innovation Can't Get Along without Them" (U.S. Small Business Administration, Office of Advocacy, December 2005), table 8.1, 186, http://www.sba.gov/advo/research/sbe_05_ch08.pdf (accessed October 10, 2008).

Small business owners are also particularly adept at finding new ways of doing old things. In 1994, for example, a young computer-science graduate working on Wall Street came up with the novel idea of selling books over the Internet. During the first year of operations, sales at Jeff Bezos's new company—Amazon.com—reached half a million dollars. In less than twenty years, annual sales had topped \$34 billion. Yahoo.com, Amazon Income Statement, <http://finance.yahoo.com/q?s=AMZN&q1=0> (accessed August 30, 2011). Not only did his innovative approach to online retailing make Bezos enormously rich, but it also established a viable model for the e-commerce industry.

Why are small businesses so innovative? For one thing, they tend to offer environments that appeal to individuals with the talent to invent new products or improve the way things are done. Fast decision making is encouraged, their research programs tend to be focused, and their compensation structures typically reward top performers. According to one SBA study, the supportive environments of small firms are roughly thirteen times more innovative per employee than the less innovation-friendly environments in which large firms traditionally operate. William J. Baumol, "Small Firms: Why Market-Driven Innovation Can't Get Along without Them" (U.S. Small Business Administration, Office of Advocacy, December 2005), http://www.sba.gov/advo/research/sbe_05_ch08.pdf (accessed October 10, 2008), 187.

The success of small businesses in fostering creativity has not gone unnoticed by big businesses. In fact, many large companies have responded by downsizing to act more like small companies. Some large organizations now have separate work units whose purpose is to spark innovation. Individuals working in these units can focus their attention on creating new products that can then be developed by the company.

Opportunities for Women and Minorities

Small business is the portal through which many people enter the economic mainstream. Business ownership allows individuals, including women and minorities, to achieve financial success, as well as pride in their accomplishments. While the majority of small businesses are still owned by white males, the past two decades have seen a substantial increase in the number of businesses owned by women and minorities. **Figure 5.3 "Businesses Owned by Women and Minorities"** gives you an idea of how many American businesses are owned by women and minorities, and indicates how much the numbers grew between 1982 and 2007. "Estimates of Business Ownership by Gender, Ethnicity, Race, and Veteran Status: 2007," U.S. Census Bureau, <http://www.census.gov/econ/sbo/#hispanic> (accessed August 30, 2011).

What Small Businesses Do for Big Businesses

Small firms complement large firms in a number of ways. They supply many of the components needed by big companies. For example, the U.S. automakers depend on more than 1,700 suppliers to provide them with the parts needed to make their cars. While many of the suppliers are large, there are hundreds of smaller companies that provide a substantial portion of the 8,000 to 12,000 parts that go into each vehicle. Bill Canis and Brent D. Yacobucci, “The U.S. Motor Vehicle Industry: Confronting a New Dynamic in the Global Economy, Congressional Research Service,” Federation of American Scientists, <http://www.fas.org/sgp/crs/misc/R41154.pdf> (accessed August 30, 2011). Small firms also provide large ones with such services as accounting, legal, and insurance. Many small firms provide *outsourcing* services to large firms—that is, they hire themselves out to help with special projects or handle certain business functions. A large firm, for example, might hire a small one to handle its billing or collection services or to manage its health care benefits. A large company might contract with a small information technology firm to manage its Web site or oversee software upgrades.

Small companies provide another valuable service to large companies by acting as sales agents for their products. For example, automobile dealerships, which are generally small businesses, sell vehicles for the big car makers. Local sporting goods stores sell athletic shoes made by industry giants, such as Adidas and Nike. Your corner deli sells products made by large companies, such as Coca-Cola and Frito-Lay.

KEY TAKEAWAYS

- According to the SBA, a **small business** is independently owned and operated, exerts little influence in its industry, and (with minimal exceptions) has fewer than five hundred employees.
- The nearly twenty-seven million small businesses in the United States generate about 50 percent of our GDP. They also contribute to growth and vitality in several important areas of economic and socioeconomic development. In particular, small businesses do the following:
 1. Create jobs
 2. Spark innovation
 3. Provide opportunities for women and minorities to achieve financial success and independence
- Small businesses tend to foster environments that appeal to individuals with the talent to invent new products or improve the way things are done. They typically make faster decisions, their research programs often are focused, and their compensation structures frequently reward top performers.
- Small firms supply many of the components needed by big companies. They also provide large firms with such services as accounting, legal, and insurance, and many provide *outsourcing* services to large companies—that is, they hire themselves out to help with special projects or handle certain business functions. Small companies (such as automotive dealerships) often act as sales agents for the products of large businesses (for example, car makers).

EXERCISE

How “small” is a small business? If a substantial portion of small businesses in the United States suddenly closed, what would be the impact on the U.S. economy? How would all these closings affect workers, consumers, and other businesses?

5.3 What Industries Are Small Businesses In?

LEARNING OBJECTIVES

1. Describe the *goods-producing* and *service-producing* sectors of an economy.
2. Identify the industries in which small businesses are concentrated.

If you want to start a new business, you probably should avoid certain types of businesses. You'd have a hard time, for example, setting up a new company to make automobiles or aluminum, because you'd have to make tremendous investments in property, plant, and equipment, and raise an enormous amount of capital to pay your workforce.

Fortunately, plenty of opportunities are still available if you're willing to set your sights a little lower. Many types of businesses require reasonable initial investments, and not surprisingly, these are the ones that usually present attractive small business opportunities.

Industries by Sector

We'll have more to say about industries and how to analyze them in later chapters. Here, we'll simply define an *industry* as a group of companies that compete with one another to sell similar products, and we'll focus on the relationship between a small business and the industry in which it operates. First, we'll discuss the industries in which small businesses tend to be concentrated. To do this, we'll divide businesses into two broad types of industries, or sectors: the goods-producing sector and the service-producing sector.

- The **goods-producing sector**⁴ includes all businesses that produce tangible goods. Generally speaking, companies in this sector are involved in manufacturing, construction, and agriculture.
- The **service-producing sector**⁵ includes all businesses that provide services but don't make tangible goods. They may be involved in retail and wholesale trade, transportation, finance, insurance, real estate, arts, entertainment, recreation, accommodations, food service, education, and such professional activities as technical services, health care, advertising, accounting, and personal services.

4. All businesses whose primary purpose is to produce tangible goods.

5. All businesses whose primary purpose is to provide a service rather than make tangible goods.

About 20 percent of small businesses in the United States are concentrated in the goods-producing sector. The remaining 80% are in the service sector. “July 2010 - Preliminary Information on Business Owner Demographics by the U.S. Census Bureau,” Small Business Administration, Office of Advocacy, <http://www.sba.gov/advocacy/850/12493> (accessed August 31, 2011). The high concentration of small businesses in the service-producing sector reflects the makeup of the overall U.S. economy. Over the past fifty years, the service-producing sector has been growing at an impressive rate. In 1960, for example, the goods-producing sector accounted for 38 percent of GDP, the service-producing sector for 62 percent. By 2010, the balance had shifted dramatically, with the goods-producing sector accounting for only 22 percent of GDP, while the service-producing sector had grown to 77 percent. “GDP Composition by Sector,” The World Fact Book, <https://www.cia.gov/library/publications/the-world-factbook/fields/2012.html> (accessed August 31, 2011).

Figure 5.4

A high percentage of small businesses are in the retail sector.

© 2010 Jupiterimages Corporation

Goods-Producing Sector

The largest areas of the goods-producing sector are construction and manufacturing. Construction businesses are often started by skilled workers, such as electricians, painters, plumbers, and home builders. They tend to be small and generally work on local projects. Though manufacturing is primarily the domain of large businesses, there are exceptions. BTIO/Realityworks, for example, is a manufacturing enterprise (components come from Ohio and China, and assembly is done in Wisconsin).

Another small manufacturer is Reveal Entertainment, which was founded in 1996 to make and distribute board games. Founder Jeffrey Berndt started with a single award-winning game—a three-dimensional finance and real estate game called “Tripoly”—and now boasts a product line of dozens of board games. There are strategy games, like “Squad Seven,” which uses a CD soundtrack to guide players through a jungle in search of treasure; children’s games, like “Portfolio Junior,” which teaches kids the rudiments of personal finances; and party games, like “So Sue Me,” in which players get to experience the fun side of suing their neighbors and taking their possessions. Go to Reveal Entertainment at <http://www.revealgames.com> (accessed August 31, 2011).

How about making something out of trash? Daniel Blake never followed his mother's advice at dinner when she told him to eat everything on his plate. When he served as a missionary in Puerto Rico, Aruba, Bonaire, and Curacao after his first year in college, he noticed that the families he stayed with didn't follow her advice either. But they didn't throw their uneaten food into the trash. Instead they put it on a compost pile and used the mulch to nourish their vegetable gardens and fruit trees. While eating at an all-you-can-eat breakfast buffet back home at Brigham Young University, Blake was amazed to see volumes of uneaten food in the trash. This triggered an idea: why not turn the trash into money. Two years later, he was running his company—EcoScraps—that collects 40 tons of food scraps a day from 75 grocers (including Costco) and turns it into high-quality potting soil that he sells online and to nurseries and garden supply stores. What's his profit from this venture? Almost half a million dollars on sales of \$1.5 million. Beats cleaning your plate. One person's trash is another person's treasure.

Service-Producing Sector

Many small businesses in this sector are *retailers*—they buy goods from other firms and sell them to consumers, in stores, by phone, through direct mailings, or over the Internet. In fact, entrepreneurs are turning increasingly to the Internet as a venue for start-up ventures. Take Tony Roeder, for example, who had a fascination with the red Radio Flyer wagons that many of today's adults had owned as children. In 1998, he started an online store through Yahoo! to sell red wagons from his home. In three years, he turned his online store into a million-dollar business. Isabel Isidro, "Riding High on the Wave of Success, RedWagons.com," PowerHomeBiz.com, <http://www.powerhomebiz.com/OnlineSuccess/redwagons.htm> (accessed August 31, 2011). When we talk about Internet entrepreneurs, we have to mention Mark Zuckerberg, the king of Internet entrepreneurship. As is well known, he founded Facebook while a student at Harvard and, by age 27, had built up a personal wealth of \$13.5 billion. "World's Billionaires: Mark Zuckerberg," *Forbes*, <http://www.forbes.com/profile/mark-zuckerberg> (accessed August 31, 2011).

Other small business owners in this sector are *wholesalers*—they sell products to businesses that buy them for resale or for company use. A local bakery, for example, is acting as a wholesaler when it sells desserts to a restaurant, which then resells them to its customers. A small business that buys flowers from a local grower (the manufacturer) and resells them to a retail store is another example of a wholesaler.

A high proportion of small businesses in this sector provide professional, business, or personal services. Doctors and dentists are part of the service industry, as are insurance agents, accountants, and lawyers. So are businesses that provide personal services, such as dry cleaning and hairdressing.

David Marcks, for example, entered the service industry about fourteen years ago when he learned that his border collie enjoyed chasing geese at the golf course where he worked. Anyone who's been on a golf course recently knows exactly what the goose problem is. While they are lovely to look at, they answer the call of nature on tees, fairways, and greens. That's where Marcks's company, Geese Police, comes in: Marcks employs specially trained dogs to chase the geese away. He now has twenty-seven trucks, thirty-two border collies, and five offices. Golf courses account for only about 5 percent of his business, as his dogs now patrol corporate parks and playgrounds as well. Isabel M. Isidro, "Geese Police: A Real-Life Home Business Success Story," *PowerHomeBiz.com* (2008), <http://www.powerhomebiz.com/OnlineSuccess/geesepolice.htm> (accessed October 8, 2008); See <http://www.youtube.com/watch?v=86veqLldnck> (accessed August 31, 2011).

Figure 5.5 "Small Business by Industry" provides a more detailed breakdown of small businesses by industry.

Figure 5.5 Small Business by Industry

KEY TAKEAWAYS

- An *industry* is a group of companies that compete with one another to sell similar products. There are two broad types of industries, or *sectors*:
 1. The **goods-producing sector** includes all businesses that produce tangible goods.
 2. The **service-producing sector** includes all businesses that provide services but don't make tangible goods.
- The largest areas of the goods-producing sector are construction and manufacturing. Construction businesses are often started by skilled workers, such as electricians, painters, plumbers, and home builders. These businesses tend to be small and generally focused on local projects. Though manufacturing is primarily the domain of large businesses, there are exceptions.
- Many small businesses in the service-producing sector are *retailers*—they buy goods from other firms and resell them to consumers, in stores, by phone, through direct mailings, or over the Internet. Other small business owners in this sector are *wholesalers*—they sell products to businesses that buy them for resale or for company use. A high proportion of small businesses in this sector provide professional, business, or personal services.

EXERCISE

Why are most small businesses found in the service-producing sector? Identify five small service-producing businesses that you patronize frequently. What kinds of small businesses are found in the goods-producing sector? What small goods-producing firms do you do business with regularly?

5.4 Advantages and Disadvantages of Business Ownership

LEARNING OBJECTIVE

1. Summarize the advantages and disadvantages of business ownership.

Do you want to be a business owner someday? Before deciding, you might want to consider the following advantages and disadvantages of business ownership. Small Business Development Center, “Pros and Cons of Owning a Business,” <http://72.14.203.104/u/siu?q=cache:DFSPVtmg7j0J:http://www.siu.edu/sbdc/buscheck.htm+pros+and+cons+of+owning+a+business&hl=en&gl=us&ct=clnk&cd=1&ie=UTF-8> (accessed April 21, 2006).

Advantages of Small Business Ownership

Being a business owner can be extremely rewarding. Having the courage to take a risk and start a venture is part of the American dream. Success brings with it many advantages:

- *Independence.* As a business owner, you’re your own boss. You can’t get fired. More importantly, you have the freedom to make the decisions that are crucial to your own business success.
- *Lifestyle.* Owning a small business gives you certain lifestyle advantages. Because you’re in charge, you decide when and where you want to work. If you want to spend more time on nonwork activities or with your family, you don’t have to ask for the time off. If it’s important that you be with your family all day, you might decide to run your business from your home. Given today’s technology, it’s relatively easy to do. Moreover, it eliminates commuting time.
- *Financial rewards.* In spite of high financial risk, running your own business gives you a chance to make more money than if you were employed by someone else. You benefit from your own hard work.
- *Learning opportunities.* As a business owner, you’ll be involved in all aspects of your business. This situation creates numerous opportunities to gain a thorough understanding of the various business functions.
- *Creative freedom and personal satisfaction.* As a business owner, you’ll be able to work in a field that you really enjoy. You’ll be able to put your skills and knowledge to use, and you’ll gain personal satisfaction from

implementing your ideas, working directly with customers, and watching your business succeed.

Disadvantages of Small Business Ownership

As the little boy said when he got off his first roller-coaster ride, “I like the ups but not the downs!” Here are some of the risks you run if you want to start a small business:

- *Financial risk.* The financial resources needed to start and grow a business can be extensive. You may need to commit most of your savings or even go into debt to get started. If things don’t go well, you may face substantial financial loss. In addition, there’s no guaranteed income. There might be times, especially in the first few years, when the business isn’t generating enough cash for you to live on.
- *Stress.* As a business owner, you *are* the business. There’s a bewildering array of things to worry about—competition, employees, bills, equipment breakdowns, customer problems. As the owner, you’re also responsible for the well-being of your employees.
- *Time commitment.* People often start businesses so that they’ll have more time to spend with their families. Unfortunately, running a business is extremely time-consuming. In theory, you have the freedom to take time off, but in reality, you may not be able to get away. In fact, you’ll probably have less free time than you’d have working for someone else. For many entrepreneurs and small business owners, a forty-hour workweek is a myth; see [Figure 5.6 "The Entrepreneur’s Workweek"](#). Vacations will be difficult to take and will often be interrupted. In recent years, the difficulty of getting away from the job has been compounded by cell phones, iPhones, Internet-connected laptops and iPads, and many small business owners have come to regret that they’re always reachable.
- *Undesirable duties.* When you start up, you’ll undoubtedly be responsible for either doing or overseeing just about everything that needs to be done. You can get bogged down in detail work that you don’t enjoy. As a business owner, you’ll probably have to perform some unpleasant tasks, like firing people.

In spite of these and other disadvantages, most small business owners are pleased with their decision to start a business. A survey conducted by the *Wall Street Journal* and Cicco and Associates indicates that small business owners and top-level corporate executives agree overwhelmingly that small business owners have a more satisfying business experience. Interestingly, the researchers had fully expected to find that small business owners were happy with their choices; they were, however,

surprised at the number of corporate executives who believed that the grass was greener in the world of small business ownership. Cicco and Associates Inc., “Type E Personality—Happy Days—Entrepreneurs Top Satisfaction Survey,” *Entrepreneur.com*, <http://entrepreneur-online.com/mag/article/0,1539,226838--3-,00.html> (accessed April 21, 2006).

Figure 5.6 *The Entrepreneur's Workweek*

KEY TAKEAWAYS

- There are several advantages that, generally speaking, come with success in business ownership:
 1. *Independence.* As a business owner, you're your own boss.
 2. *Lifestyle.* Because you're in charge, you decide when and where you want to work.
 3. *Financial rewards.* In spite of high financial risk, running your own business gives you a chance to make more money than if you were employed by someone else.
 4. *Learning opportunities.* As a business owner, you'll be involved in all aspects of your business.
 5. *Creative freedom and personal satisfaction.* As a business owner, you'll be able to work in a field that you really enjoy, and you'll gain personal satisfaction from watching your business succeed.
- There are also a number of potential disadvantages to consider in deciding whether to start a small business:
 1. *Financial risk.* The financial resources needed to start and grow a business can be extensive, and if things don't go well, you may face substantial financial loss. In addition, you'll have no guaranteed income.
 2. *Stress.* You'll have a bewildering array of things to worry about—competition, employees, bills, equipment breakdowns, customer problems.
 3. *Time commitment.* Running a business is extremely time-consuming. In fact, you'll probably have less free time than you'd have working for someone else.
 4. *Undesirable duties.* You'll be responsible for either doing or overseeing just about everything that needs to be done, and you'll probably have to perform some unpleasant tasks, like firing people.

EXERCISES

1. (AACSB) Analysis

First, identify five advantages of small business ownership. Next, rank these advantages according to their importance to you. Why did you rank them as you did? What factors discourage individuals from small business ownership? Indicate which of these factors might discourage you from starting a business. Explain why.

2. (AACSB) Analysis

Because you're convinced that the best way to get rich is to work for yourself, you're thinking about starting your own business. You have an idea and \$100,000 that you just inherited from a great-aunt. You even have a location: Palo Alto, California, which (according to a *Forbes* magazine article) is the best place in the United States to get rich. But there's a downside: to move to California and start your own business, you'll have to drop out of college. What financial risks should you consider in making your decision? What are your chances of succeeding with your plan? Are you willing to take the financial risk needed to start a business? Why, or why not? Are you really likely to make more money running your own business than working for someone else?

5.5 Starting a Business

LEARNING OBJECTIVES

1. Explain what it takes to start a business.
2. Evaluate the advantages and disadvantages of several small business ownership options—starting a business from scratch, buying an existing business, and obtaining a franchise.

Starting a business takes talent, determination, hard work, and persistence. It also requires a lot of research and planning. Before starting your business, you should appraise your strengths and weaknesses and assess your personal goals to determine whether business ownership is for you. From Kathleen Allen, “Getting Started in Entrepreneurship,” in *Entrepreneurship for Dummies* (New York: Wiley, 2001), 46.

Questions to Ask Before You Start a Business

If you’re interested in starting a business, you need to make decisions even before you bring your talent, determination, hard work, and persistence to bear on your project. Here are the basic questions you’ll need to address:

- What, exactly, is my business idea? Is it feasible?
- What type of business is right for me? What industry do I want to get into? Do I want to be a manufacturer, a retailer, or a wholesaler? Do I want to provide professional or personal services? Do I want to start a business that I can operate out of my home?
- Do I want to run a business that’s similar to many existing businesses? Do I want to innovate—to create a new product or a new approach to doing business?
- Do I want to start a new business, buy an existing one, or buy a franchise?
- Do I want to start the business by myself or with others?
- What form of business organization do I want?

6. Formal document describing a proposed business concept, description of the proposed business, industry analysis, mission statement and core values, a management plan, a description of goods or services, a description of production processes, and marketing and financial plans.

After making these decisions, you’ll be ready to take the most important step in the entire process of starting a business: you must describe your future business in the form of a **business plan**⁶—a document that identifies the goals of your proposed business and explains how these goals will be achieved. Think of a business plan as a

blueprint for a proposed company: it shows how you intend to build the company and how you intend to make sure that it's sturdy. You must also take a second crucial step before you actually start up your business: You need to get financing—the money from individuals, banks, or both, that you'll need to get your business off the ground. (Obviously, if you already have the necessary funds, you're one of the fortunate few who can skip this step.)

The Business Idea

For some people, coming up with a great business idea is a gratifying adventure. For most, however, it's a daunting task. The key to coming up with a business idea is identifying something that customers want—or, perhaps more importantly, filling an unmet need. Your business will probably survive only if its purpose is to *satisfy its customers*—the ultimate users of its goods or services. In coming up with a business idea, don't ask, "What do we want to sell?" but rather, "What does the customer want to buy?" Scott Thurm and Joann S. Lublin, "Peter Drucker's Legacy Includes Simple Advice: It's All about the People," *Wall Street Journal* (November 14, 2005, B1), http://online.wsj.com/public/article/SB113192826302796041.html?mod=2_1194_3 (accessed April 21, 2006).

To come up with an innovative business idea, you need to be creative. The idea itself can come from various sources. Prior experience accounts for the bulk of new business ideas. Many people generate ideas for industries they're already working in. Past experience in an industry also increases your chances of success. Take Sam Walton, the late founder of Wal-Mart. He began his retailing career at JCPenney and then became a successful franchiser of a Ben Franklin five-and-dime store. In 1962, he came up with the idea of opening large stores in rural areas, with low costs and heavy discounts. He founded his first Wal-Mart store in 1962, and when he died thirty years later, his family's net worth was \$25 billion. Peter Krass, "Sam Walton: 10 Rules for Building a Successful Business," <http://www.powerhomebiz.com/vol76/walton.htm> (accessed April 21, 2006).

Industry experience also gave Howard Schultz, a New York executive for a housewares company, his breakthrough idea. In 1981, Schultz noticed that a small customer in Seattle—Starbucks Coffee, Tea and Spice—ordered more coffeemaker cone filters than Macy's and many other large customers. So he flew across the country to find out why. His meeting with the owner-operators of the original Starbucks Coffee Co. resulted in his becoming part-owner of the company, and changed his life and the life of coffee lovers forever. Schultz's vision for the company far surpassed that of its other owners. While they wanted Starbucks to remain small and local, Schultz saw potential for a national business that not only sold world-class-quality coffee beans but also offered customers a European coffee-bar experience. After attempting unsuccessfully to convince his partners to try his

experiment, Schultz left Starbucks and started his own chain of coffee bars, which he called Il Giornale (after an Italian newspaper). Two years later, he bought out the original owners and reclaimed the name Starbucks. Howard Schultz and Dori Jones Yang, *Pour Your Heart into It* (New York: Hyperion, 1997), 24–109.

Other people come up with business ideas because of hobbies or personal interests. This was the case with Nike founder Phil Knight, who was an avid runner. He was convinced that it was possible to make high-quality track shoes that cost less than the European shoes dominating the market at the time. His track experience, coupled with his knowledge of business (Knight holds an MBA from Stanford and worked as an accountant), inspired him to start Nike. Michael Dell also turned a personal interest into a business. From a young age, he was obsessed with taking computers apart and putting them back together again, and it was this personal interest that led to his great business idea. At college, instead of attending classes, he spent his time assembling computers and, eventually, founded Dell, Inc.

We will expand on this important topic of idea generation and creativity in other chapters.

Ownership Options

As we've already seen, you can become a small business owner in one of three ways—by starting a new business, buying an existing one, or obtaining a franchise. Let's look more closely at the advantages and disadvantages of each option.

Starting from Scratch

Figure 5.7

SUBWAY, the largest franchise in the world, grew from a tiny sandwich shop started in 1965 by seventeen-year-old Fred DeLuca hoping to put himself through college.

Source: http://commons.wikimedia.org/wiki/File:Subway_restaurant_Pittsfield_Township_Michigan.JPG

The most common—and the riskiest—option is starting from scratch. This approach lets you start with a clean slate and allows you to build the business the way you want. You select the goods or services that you’re going to offer, secure your location, and hire your employees, and then it’s up to you to develop your customer base and build your reputation. This is the path taken by Andres Mason who figured out how to inject hysteria into the process of bargain hunting on the Web. The result is an overnight success story called Groupon. Christopher Steiner, “Meet the Fastest Growing Company Ever,” *Forbes*, <http://www.forbes.com/forbes/2010/0830/entrepreneurs-groupon-facebook-twitter-next-web-phenom.html>, (accessed August 31, 2011). Here is how Groupon (a blend of the words “group” and “coupon”) works: A daily email is sent to 6.5 million people in 70 cities across the United States offering a deeply discounted deal to buy something or to do something in their city. If the person receiving the email likes the deal, he or she commits to buying it. But, here’s the catch, if not enough people sign up for the deal, it is cancelled. Groupon makes money by keeping half of the revenue from the deal. The company offering the product or service gets exposure. But stay tuned: the “daily deals website isn’t

just unprofitable—it's bleeding hundreds of millions of dollars.”“Groupon's 'Startling' Reversal of Fortune,” *The Week*, <http://news.yahoo.com/groupons-startling-reversal-fortune-172800802.html> (accessed August 31, 2011). As with all start-ups cash is always a problem.

Buying an Existing Business

If you decide to buy an existing business, some things will be easier. You'll already have a proven product, current customers, active suppliers, a known location, and trained employees. You'll also find it much easier to predict the business's future success. There are, of course, a few bumps in this road to business ownership. First, it's hard to determine how much you should pay for a business. You can easily determine how much things like buildings and equipment are worth, but how much should you pay for the fact that the business already has steady customers?

In addition, a business, like a used car, might have performance problems that you can't detect without a test drive (an option, unfortunately, that you don't get when you're buying a business). Perhaps the current owners have disappointed customers; maybe the location isn't as good as it used to be. You might inherit employees that you wouldn't have hired yourself. Finally, what if the previous owners set up a competing business that draws away their former—and your current—customers?

Getting a Franchise

Lastly, you can buy a **franchise**⁷. Under this setup, a *franchiser* (the company that sells the franchise) grants the *franchisee* (the buyer—you) the right to use a brand name and to sell its goods or services. Franchises market products in a variety of industries, including food, retail, hotels, travel, real estate, business services, cleaning services, and even weight-loss centers and wedding services. There are thousands of franchises, many of which are quite familiar—SUBWAY, McDonald's, 7-Eleven, Holiday Inn, Budget Car Rental, RadioShack, and Jiffy Lube.

As you can see from [Figure 5.8 "The Growth of Franchising, 1980–2007"](#), franchising has become an extremely popular way to do business. A new franchise outlet opens once every eight minutes in the United States, where one in ten businesses is now a franchise. Franchises employ eight million people (13 percent of the workforce) and account for 17 percent of all sales in this country (\$1.3 trillion).“Census Bureau's First Release of Comprehensive Franchise Data Shows Franchises Make Up More Than 10 Percent of Employer Businesses,” U.S. Census Bureau, September 14, 2010,” U.S. Census Bureau. http://www.census.gov/newsroom/releases/archives/economic_census/cb10-141.html (accessed August 31, 2011).

7. Form of business ownership in which a *franchiser* (a seller) grants a *franchisee* (a buyer) the right to use a brand name and to sell its products or services.

Figure 5.8 The Growth of Franchising, 1980–2007

In addition to the right to use a company’s brand name and sell its products, the franchisee gets help in picking a location, starting and operating the business, and advertising. In effect, you’ve bought a prepackaged, ready-to-go business that’s proven successful elsewhere. You also get ongoing support from the franchiser, which has a vested interest in your success.

Not surprisingly, these advantages don’t come cheaply. Franchises can be very expensive, usually depending on the amount of business that a franchisee is expected to do. KFC franchises, for example, require a total investment of \$1.3 million to \$2.5 million each. This fee includes the cost of the property, equipment, training, start-up costs, and the *franchise fee*—a one-time charge for the right to operate as a KFC outlet. McDonald’s is in the same price range (\$1.1 million to \$1.9 million). SUBWAY sandwich shops are more affordable, with expected total investment ranging from \$84,000 to \$258,000. If you’d prefer teaching dance and exercise classes, you could get a Jazzercise franchise for anywhere from \$3,000 to \$76,000. If you don’t want to deal in food or dance, you might want to buy a dating service. The Right One® franchises go for an initial investment of \$98,000 to \$254,000, depending on location. “Entrepreneur 2011 Franchise 500,” *Entrepreneur*, <http://www.entrepreneur.com/franchises/franchise500/index.html> (accessed August 31, 2011).

In addition to your initial investment, you’ll have to pay two other fees on a monthly basis—a *royalty fee* (typically from 3 to 12 percent of sales) for continued support from the franchiser and the right to keep using the company’s trade name, plus an *advertising fee* to cover your share of national and regional advertising. You’ll also be expected to buy your products from the franchiser. Michael Seid and Kay Marie Ainsley, “Franchise Fee—Made Simple,” *Entrepreneur.com*,

<http://www.entrepreneur.com/article/0,4621,299085,00.html> (accessed April 21, 2006).

Why do would-be business owners like franchises? For one thing, buying a franchise lets you start up under fairly safe conditions, with a proven model for running a company and a permanent support team. You can profit from name recognition without having to develop your own image in the marketplace, and you can be your own boss (as long as you comply with the standards set by the franchiser).

But there are disadvantages. The cost of obtaining and running a franchise can be high, and you have to play by the franchiser's rules, even when you disagree with them. The franchiser maintains a great deal of control over its franchisees. For example, if you own a fast-food franchise, the franchise agreement will likely dictate the food and beverages you can sell; the methods used to store, prepare, and serve the food; and the prices you'll charge. In addition, the agreement will dictate what the premises will look like and how they'll be maintained.

Finally, franchisers don't always keep their promises. What do you do if the promised advertising or employee training doesn't materialize? What do you do if you're forced to make unnecessary and costly alterations to your premises, or the franchising company sets up a competing establishment nearby? What if the franchising company gets bad press, which, in turn, hurts your sales? You always have the option of suing the franchiser, but this is time-consuming and costly. As with any business venture, you need to do your homework before investing in a franchise.

KEY TAKEAWAYS

- Before starting a business, you need to ask yourself a few basic questions:
 1. What, exactly, is my *business idea*? Is it feasible?
 2. What type of business is right for me? What *industry* do I want to get into?
 3. Do I want to run a business that’s similar to many existing businesses, or do I want to innovate?
 4. Do I want to start a new business, take over an existing one, or buy a franchise?
 5. Do I want to start the business by myself, or do I want company?
 6. What form of *business organization* do I want?
- After you’ve addressed these basic questions, you’ll be ready to describe your future business in the form of a **business plan**—a document that identifies the goals of your proposed business and explains how it will achieve them. Before you actually start up your business, you must also get financing.
- The key to coming up with a business idea is identifying something that customers want. Your business will probably survive only if its “purpose” is to *satisfy its customers*—the ultimate users of its goods or services.
- You can become a small business owner in one of three ways, each of which has advantages and disadvantages:
 1. *Starting from scratch*. This is the most common—and riskiest—option. *Advantage*: You start with a clean slate and build the business the way you want. *Disadvantage*: It’s up to you to develop your customer base and build your reputation.
 2. *Buying an existing business*. This option is not as risky as starting a business from scratch, but it has some drawbacks. *Advantages*: You’ll already have a proven product, current customers, active suppliers, a known location, and trained employees. *Disadvantages*: It’s hard to determine how much to pay for a business; perhaps the current owners have disappointed customers; maybe the location isn’t as good as it used to be.

3. *Buying a franchise.* Under a **franchise** setup, a *franchiser* (the company that sells the franchise) grants the *franchisee* (the buyer) the right to use a brand name and to sell its goods or services. *Advantages:* You've bought a prepackaged, ready-to-go business that's proven successful elsewhere; you also get ongoing support from the franchiser. *Disadvantages:* The cost can be high; you have to play by the franchiser's rules; and franchisers don't always keep their promises.

EXERCISES

1. (AACSB) Analysis

If business ownership interests you, you can start a new business, buy an existing one, or obtain a franchise. Evaluate the advantages and disadvantages of each option. Which option do you find most appealing, and why? Describe the business you would probably start.

2. (AACSB) Analysis

How would you like to spend your summer collecting trash in a used pickup? Doesn't sound very appealing, does it? Would you quit college to do it full time? Probably not. But that's exactly what Brian Scudamore did. And he got very rich doing it. His summer job turned into the company known as 1-800-GOT-JUNK, one of the fastest-growing franchises in the United States and Canada. Go to <http://www.1800gotjunk.com> to link to the Web site and learn more about the company. After looking at the Web site, answer the following questions:

- a. What is the company's business model? What does it do? Where does it do it?
- b. Are you the kind of person the company wants to attract as a franchise partner?
- c. How much would it cost you to buy a franchise? How much total capital would you need?
- d. What kinds of support and services would you receive from the company?
- e. Assuming that you had enough money, would you buy a franchise? Why, or why not?

As a reward for working hard, take a break and click on the Junk Genie icon on the bottom of the company's home page (<http://www.1800gotjunk.com>). Can you figure out the trick? Pass it along to your friends.

5.6 The Business Plan

LEARNING OBJECTIVE

1. Discuss the importance of planning for your business, and identify the key sections of a business plan.

If you want to start a business, you must prepare a business plan. This essential document should tell the story of your business concept, provide an overview of the industry in which you will operate, describe the goods or services you will provide, identify your customers and proposed marketing activities, explain the qualifications of your management team, and state your projected income and borrowing needs.

Purpose of a Business Plan

The business plan is a plan or blueprint for the company, and it's an indispensable tool in attracting investors, obtaining loans, or both. Remember, too, that the value of your business plan isn't limited to the planning stages of your business and the process of finding start-up money. Once you've acquired start-up capital, don't just stuff your plan in a drawer. Treat it as an ongoing guide to your business and its operations, as well as a yardstick by which you can measure your performance. Keep it handy, update it periodically, and use it to assess your progress.

In developing and writing your business plan, you must make strategic decisions in the areas of management, operations, marketing, accounting, and finance—in short, in all the functional areas of business that we described in [Chapter 1 "The Foundations of Business"](#). Granted, preparing a business plan takes a lot of time and work, but it's well worth the effort. A business plan forces you to think critically about your proposed business and reduces your risk of failure. It forces you to analyze your business concept and the industry in which you'll be operating, and it helps you determine how you can grab a percentage of sales in that industry.

The most common use of a business plan is persuading investors, lenders, or both, to provide financing. These two groups look for different things. Investors are particularly interested in the quality of your business concept and the ability of management to make your venture successful. Bankers and other lenders are primarily concerned with your company's ability to generate cash to repay loans. To persuade investors and lenders to support your business, you need a

professional, well-written business plan that paints a clear picture of your proposed business.

Sections of the Business Plan

Though formats can vary, a business plan generally includes the following sections: executive summary, description of proposed business, industry analysis, mission statement and core values, management plan, goods or services and (if applicable) production processes, marketing, global issues, and financial plan. Let's explore each of these sections in more detail. (*Note: More detailed documents and an Excel template are available for those classes in which the optional business plan project is assigned.*)

Executive Summary

The **executive summary**⁸ is a one- to three-page overview of the business plan. It's actually the most important part of the business plan: it's what the reader looks at first, and if it doesn't capture the reader's attention, it might be the only thing that he or she looks at. It should therefore emphasize the key points of the plan and get the reader excited about the prospects of the business.

Even though the executive summary is the first thing read, it's written *after* the other sections of the plan are completed. An effective approach in writing the executive summary is to paraphrase key sentences from each section of the business plan. This process will ensure that the key information of each section is included in the executive summary.

Description of Proposed Business

Here, you present a *brief* description of the company and tell the reader why you're starting your business, what benefits it provides, and why it will be successful. Some of the questions to answer in this section include the following:

- What will your proposed company do? Will it be a manufacturer, a retailer, or a service provider?
- What goods or services will it provide?
- Why are your goods or services unique?
- Who will be your main customers?
- How will your goods or services be sold?
- Where will your business be located?

8. Overview emphasizing the key points of a business plan to get the reader excited about the business's prospects.

Because later parts of the plan will provide more detailed discussions of many of these issues, this section should provide only an overview of these topics.

Industry Analysis

This section provides a brief introduction to the industry in which you propose to operate. It describes both the current situation and the future possibilities, and it addresses such questions as the following:

- How large is the industry? What are total sales for the industry, in volume and dollars?
- Is the industry mature or are new companies successfully entering it?
- What opportunities exist in the industry? What threats exist?
- What factors will influence future expansion or contraction of the industry?
- What is the overall outlook for the industry?
- Who are your major competitors in the industry?
- How does your product differ from those of your competitors?

Mission Statement and Core Values

This portion of the business plan states the company's *mission statement* and *core values*. The **mission statement**⁹ describes the purpose or *mission* of your organization—its reason for existence. It tells the reader what the organization is committed to doing. For example, one mission statement reads, “The mission of Southwest Airlines is dedication to the highest quality of customer service delivered with a sense of warmth, friendliness, individual pride, and company spirit.” Southwest Airline’s company Web site, about SWA section, http://www.southwest.com/about_swa/mission.html (accessed August 31, 2011).

9. Statement describing an organization’s purpose or *mission*—its reason for existence—and telling stakeholders what the organization is committed to doing.

10. Statement of fundamental beliefs describing what’s appropriate and important in conducting organizational activities and providing a guide for the behavior of organization members.

Core values¹⁰ are fundamental beliefs about what’s important and what is (and isn’t) appropriate in conducting company activities. Core values are not about profits, but rather about ideals. They should help guide the behavior of individuals in the organization. Coca-Cola, for example, intends that its core values—leadership, passion, integrity, collaboration, diversity, quality, and accountability—will let employees know what behaviors are (and aren’t) acceptable. “Workplace Culture,” The Coca-Cola Company, http://www.thecoca-colacompany.com/citizenship/workplace_culture.html (accessed August 31, 2011).

Management Plan

Management makes the key decisions for the business, such as its legal form and organizational structure. This section of the business plan should outline these decisions and provide information about the qualifications of the key management personnel.

A. Legal Form of Organization

This section identifies the chosen legal form of business ownership: sole proprietorship (personal ownership), partnership (ownership shared with one or more partners), or corporation (ownership through shares of stock).

B. Qualifications of Management Team and Compensation Package

It isn't enough merely to have a good business idea: you need a talented management team that can turn your concept into a profitable venture. This part of the management plan section provides information about the qualifications of each member of the management team. Its purpose is to convince the reader that the company will be run by experienced, well-qualified managers. It describes each individual's education, experience, and expertise, as well as each person's responsibilities. It also indicates the estimated annual salary to be paid to each member of the management team.

C. Organizational Structure

This section of the management plan describes the relationships among individuals within the company, listing the major responsibilities of each member of the management team.

Goods, Services, and the Production Process

To succeed in attracting investors and lenders, you must be able to describe your goods or services clearly (and enthusiastically). Here, you describe all the goods and services that you will provide the marketplace. This section explains why your proposed offerings are better than those of competitors and indicates what market needs will be met by your goods or services. In other words, it addresses a key question: What *competitive advantage* will the company's goods and services have over similar products on the market?

This section also indicates how you plan to obtain or make your products. Naturally, the write-up will vary, depending on whether you're proposing a service company,

a retailer, or a manufacturer. If it's a service company, describe the process by which you'll deliver your services. If it's a retail company, tell the reader where you'll purchase products for resale.

If you're going to be a manufacturer, you must furnish information on product design, development, and production processes. You must address questions such as the following:

- How will products be designed?
- What technology will be needed to design and manufacture products?
- Will the company run its own production facilities, or will its products be manufactured by someone else?
- Where will production facilities be located?
- What type of equipment will be used?
- What are the design and layout of the facilities?
- How many workers will be employed in the production process?
- How many units will be produced?
- How will the company ensure that products are of high quality?

Marketing

This critical section focuses on four marketing-related areas—target market, pricing, distribution, and promotion:

1. *Target market.* Describe future customers and profile them according to age, gender, income, interests, and so forth. If your company will sell to other companies, describe your typical business customer.
2. *Pricing.* State the proposed price for each product. Compare your pricing strategy to that of competitors.
3. *Distribution.* Explain how your goods or services will be distributed to customers. Indicate whether they'll be sold directly to customers or through retail outlets.
4. *Promotion.* Explain your promotion strategy, indicating what types of advertising you'll be using.

In addition, if you intend to use the Internet to promote or sell your products, also provide answers to these questions:

- Will your company have a Web site? Who will visit the site?
- What will the site look like? What information will it supply?
- Will you sell products over the Internet?

- How will you attract customers to your site and entice them to buy from your company?

Global Issues

In this section, indicate whether you'll be involved in international markets, by either buying or selling in other countries. If you're going to operate across borders, identify the challenges that you'll face in your global environment, and explain how you'll meet them. If you don't plan initially to be involved in international markets, state what strategies, if any, you'll use to move into international markets when the time comes.

Financial Plan

In preparing the financial section of your business plan, specify the company's cash needs and explain how you'll be able to repay debt. This information is vital in obtaining financing. It reports the amount of cash needed by the company for start-up and initial operations and provides an overview of proposed funding sources. It presents financial projections, including expected sales, costs, and profits (or losses). It refers to a set of financial statements included in an appendix to the business plan.

Appendices

Here, you furnish supplemental information that may be of interest to the reader. In addition to a set of financial statements, for example, you might attach the résumés of your management team.

KEY TAKEAWAYS

- A **business plan** tells the story of your business concept, provides an overview of the industry in which you will operate, describes the goods or services you will provide, identifies your customers and proposed marketing activities, explains the qualifications of your management team, and states your projected income and borrowing needs.
- In your business plan, you make strategic decisions in the areas of management, operations, marketing, accounting, and finance. Developing your business plan forces you to analyze your business concept and the industry in which you'll be operating. Its most common use is persuading investors and lenders to provide financing.
- A business plan generally includes the following sections:
 1. **Executive summary.** One- to three-page overview.
 2. *Description of proposed business.* Brief description of the company that answers such questions as what your proposed company will do, what goods or services it will provide, and who its main customers will be.
 3. *Industry analysis.* Short introduction to the industry in which you propose to operate.
 4. *Mission statement and core values.* Declaration of your **mission statement**, which are fundamental beliefs about what's important and what is (and isn't) appropriate in conducting company activities.
 5. *Management plan.* Information about management team qualifications and responsibilities, and designation of your proposed legal form of organization.
 6. *Goods, services, and the production process.* Description of the goods and services that you'll provide in the marketplace; explanation of how you plan to obtain or make your products or of the process by which you'll deliver your services.
 7. *Marketing.* Description of your plans in four marketing-related areas: target market, pricing, distribution, and promotion.
 8. *Global issues.* Description of your involvement, if any, in international markets.
 9. *Financial plan.* Report on the cash you'll need for start-up and initial operations, proposed funding sources, and means of repaying your debt.

10. *Appendices.* Supplemental information that may be of interest to the reader.

EXERCISE

(AACSB) Analysis

Let's start with three givens: (1) college students love chocolate chip cookies, (2) you have a special talent for baking cookies, and (3) you're always broke. Given these three conditions, you've come up with the idea of starting an on-campus business—selling chocolate chip cookies to fellow students. As a business major, you want to do things right by preparing a business plan. First, you identified a number of specifics about your proposed business. Now, you need to put these various pieces of information into the relevant section of your business plan. Using the business plan format described in this chapter, indicate the section of the business plan into which you'd put each of the following:

1. You'll bake the cookies in the kitchen of a friend's apartment.
2. You'll charge \$1 each or \$10 a dozen.
3. Your purpose is to make the best cookies on campus and deliver them fresh. You value integrity, consideration of others, and quality.
4. Each cookie will have ten chocolate chips and will be superior to those sold in nearby bakeries and other stores.
5. You expect sales of \$6,000 for the first year.
6. Chocolate chip cookies are irresistible to college students. There's a lot of competition from local bakeries, but your cookies will be superior and popular with college students. You'll make them close to campus using only fresh ingredients and sell them for \$1 each. Your management team is excellent. You expect first-year sales of \$6,000 and net income of \$1,500. You estimate start-up costs at \$600.
7. You'll place ads for your product in the college newspaper.
8. You'll hire a vice president at a salary of \$100 a week.
9. You can ship cookies anywhere in the United States and in Canada.
10. You need \$600 in cash to start the business.
11. There are six bakeries within walking distance of the college.
12. You'll bake nothing but cookies and sell them to college students. You'll make them in an apartment near campus and deliver them fresh.

5.7 How to Succeed in Managing a Business

LEARNING OBJECTIVES

1. Discuss ways to succeed in managing a business, and explain why some businesses fail.
2. Identify sources of small business assistance from the Small Business Administration.

Why Do Businesses Succeed?

Being successful as a business owner requires more than coming up with a brilliant idea and working hard. You need to learn how to manage and grow your business. In the process, you'll face numerous challenges, and your ability to meet them will be a major factor in your success (or failure). "D&B—The Challenges of Managing a Small Business," <http://www.dnbexpress.ca/ChallengesSmallBusiness.html> (accessed October 30, 2008). To give yourself a fighting chance in making a success of your business, you should do the following:

- *Know your business.* It seems obvious, but it's worth mentioning: successful businesspeople know what they're doing. They're knowledgeable about the industry in which they operate (both as it stands today and where it's headed), and they know who their competitors are. They know how to attract customers and who the best suppliers and distributors are, and they understand the impact of technology on their business.
- *Know the basics of business management.* You might be able to *start* a business on the basis of a great idea, but to *manage* it you need to understand the functional areas of business—accounting, finance, management, marketing, and production. You need to be a salesperson, as well as a decision maker and a planner.
- *Have the proper attitude.* When you own a business, you *are* the business. If you're going to devote the time and energy needed to transform an idea into a successful venture, you need to have a passion for your work. You should believe in what you're doing and make a strong personal commitment to your business.
- *Get adequate funding.* It takes a lot of money to start a business and guide it through the start-up phase (which can last for over a year). You can have the most brilliant idea in the world, the best marketing approach, and a talented management team, yet if you run out of cash,

your career as a business owner could be brief. Plan for the long term and work with lenders and investors to ensure that you'll have sufficient funds to get open, stay open during the start-up phase, and, ultimately, expand.

- *Manage your money effectively.* You'll be under constant pressure to come up with the money to meet payroll and pay your other bills. That's why you need to keep an eye on *cash flow*—money coming in and money going out. You need to control costs and collect money that's owed you, and, generally, you need to know how to gather the financial information that you require to run your business.
- *Manage your time efficiently.* A new business owner can expect to work sixty hours a week. If you want to grow a business and have some type of nonwork life at the same time, you'll have to give up some control—to let others take over some of the work. Thus, you must develop time-management skills and learn how to delegate responsibility.
- *Know how to manage people.* Hiring, keeping, and managing good people are crucial to business success. As your business grows, you'll depend more on your employees. You need to develop a positive working relationship with them, train them properly, and motivate them to provide quality goods or services.
- *Satisfy your customers.* You might attract customers through impressive advertising campaigns, but you'll keep them only by providing quality goods or services. Commit yourself to satisfying—or even exceeding—customer needs.
- *Know how to compete.* Find your niche in the marketplace, keep an eye on your competitors, and be prepared to react to changes in the marketplace. The history of business (and much of life) can be summed up in three words: “Adapt or perish.”

Why Do Businesses Fail?

If you've paid attention to the occupancy of shopping malls over a few years, you've noticed that retailers come and go with surprising frequency. The same thing happens with restaurants—indeed, with all kinds of businesses. By definition, starting a business—small or large—is risky, and though many businesses succeed, a large proportion of them don't. One-third of small businesses that have employees go out of business within the first two years. More than half of small businesses have closed by the end of their fourth year, and 70 percent do not make it past their seventh year. Amy E. Knaup and Merissa C. Piazza, “Characteristics of Survival: Longevity of Business Establishments in the Business Employment Dynamics Data: Extensions,” Bureau of Labor Statistics, <http://www.bls.gov/osmr/pdf/st060040.pdf> (accessed August 31, 2011); Amy E. Knaup and Merissa C. Piazza, “Business Employment Dynamics Data: Survival and Longevity, II, Monthly Labor Review •

September 2007,” Bureau of Labor Statistics, <http://www.bls.gov/opub/mlr/2007/09/art1full.pdf>, (accessed August 31, 2011).

Table 5.2 Survival Rate of New Companies

Number of Years after Start-up	Rate of Survival
1	81.2%
2	65.8%
3	54.3%
4	44.4%
5	38.3%
6	34.4%
7	31.2%
<p>Note: Percentages based on a total of 212,182 businesses that started up in the second quarter of 1998.</p>	

Source: “Characteristics of Survival: Longevity of Business Establishments in the Business Employment Dynamics Data: *Extension*.” <http://www.bls.gov/osmr/pdf/st060040.pdf>.

As bad as these statistics on business survival are, some industries are worse than others. If you want to stay in business for a long time, you might want to avoid some of these risky industries. Even though your friends think you make the best macaroni and cheese pizza in the world, this doesn’t mean you can succeed as a pizza parlor owner. Opening a restaurant or a bar is one of the riskiest ventures (and, therefore, start-up funding is hard to get). You might also want to avoid the transportation industry. Owning a taxi might appear lucrative until you find out what a taxi license costs. It obviously varies by city, but in New York City the price tag is upward of \$400,000. And setting up a shop to sell clothing can be challenging. Your view of “what’s in” may be off, and one bad season can kill your business. The same is true for stores selling communication devices: every mall has one or more cell phone stores so the competition is steep, and business can be very slow. Maureen Farrell, “Risky Business: 44% of Small Firms Reach Year 4,” *Forbes*,

http://www.msnbc.msn.com/id/16872553/ns/business-forbes_com/t/risky-business-small-firms-reach-year/#.Tl_xVY7CclA (accessed August 31, 2011).

Businesses fail for any number of reasons, but many experts agree that the vast majority of failures result from some combination of the following problems:

- *Bad business idea.* Like any idea, a business idea can be flawed, either in the conception or in the execution. If you tried selling snowblowers in Hawaii, you could count on little competition, but you'd still be doomed to failure.
- *Cash problems.* Too many new businesses are underfunded. The owner borrows enough money to set up the business but doesn't have enough extra cash to operate during the start-up phase, when very little money is coming in but a lot is going out.
- *Managerial inexperience or incompetence.* Many new business owners have no experience in running a business; many have limited management skills. Maybe an owner knows how to make or market a product but doesn't know how to manage people. Maybe an owner can't attract and keep talented employees. Maybe an owner has poor leadership skills and isn't willing to plan ahead.
- *Lack of customer focus.* A major advantage of a small business is the ability to provide special attention to customers. But some small businesses fail to seize this advantage. Perhaps the owner doesn't anticipate customers' needs or keep up with changing markets or the customer-focused practices of competitors.
- *Inability to handle growth.* You'd think that a sales increase would be a good thing. Often it is, of course, but sometimes it can be a major problem. When a company grows, the owner's role changes. He or she needs to delegate work to others and build a business structure that can handle the increase in volume. Some owners don't make the transition and find themselves overwhelmed. Things don't get done, customers become unhappy, and expansion actually damages the company.

Help from the SBA

If you had your choice, which cupcake would you pick—vanilla Oreo, tripple chocolate, or latte? In the last few years, cupcake shops are popping up in almost every city. Perhaps the bad economy has put people in the mood for small, relatively inexpensive treats. Whatever the reason, you're fascinated with the idea of starting a cupcake shop. You have a perfect location, have decided what equipment you need, and have tested dozens of recipes (and eaten lots of cupcakes). You are set to go with one giant exception: you don't have enough savings to cover

your start-up costs. You have made the round of most local banks, but they are all unwilling to give you a loan. So what do you do? Fortunately, there is help available. It is through your local Small Business Administration (SBA), which offers an array of programs to help current and prospective small business owners. The SBA won't actually loan you the money, but it will increase the likelihood that you will get funding from a local bank by guaranteeing the loan. Here's how the SBA's loan guaranty program works: You apply to a bank for financing. A loan officer decides if the bank will loan you the money without an SBA guarantee. If the answer is no (because of some weakness in your application), the bank then decides if it will loan you the money if the SBA guarantees the loan. If the bank decides to do this, you get the money and make payments on the loan. If you default on the loan, the government reimburses the bank for its loss, up to the amount of the SBA guarantee.

In the process of talking with someone at the SBA, you will discover other programs it offers that will help you start your business and manage your organization. For example, to apply for funding you will need a well-written business plan. Once you get the loan and move to the business start-up phase, you will have lots of questions that need to be answered (including setting up a computer system for your company). And you are sure you will need help in a number of areas as you operate your cupcake shop. Fortunately, the SBA can help with all of these management and technical-service tasks.

This assistance is available through a number of channels, including the SBA's extensive Web site, online courses, and training programs. A full array of individualized services is also available. The **Small Business Development Center (SBDC)**¹¹ assists current and prospective small business owners with business problems and provides free training and technical information on all aspects of small business management. These services are available at approximately one thousand locations around the country, many housed at colleges and universities. U.S. Small Business Administration, "Office of Small Business Development Centers: Entrepreneurial Development," *Services*, <http://www.sba.gov/aboutsba/sbaprograms/sbdc/index.html> (accessed August 31, 2011).

11. SBA program in which centers housed at colleges and other locations provide free training and technical information to current and prospective small business owners.

12. SBA program in which a businessperson needing advice is matched with a member of a team of retired executives working as volunteers.

If you need individualized advice from experienced executives, you can get it through the **Service Corps of Retired Executives (SCORE)**¹². Under the SCORE program, a businessperson needing advice is matched with someone on a team of retired executives who work as volunteers. Together, the SBDC and SCORE help more than a million small businesspersons every year. U.S. Small Business Administration, *SCORE—Counselors to America's Small Businesses*, <http://www.score.org/index.html> (accessed August 31, 2011); SBDC Economic Impact, <http://www.score.org/index.html> (accessed August 31, 2011).

KEY TAKEAWAYS

- Business owners face numerous challenges, and the ability to meet them is a major factor in success (or failure). As a business owner, you should do the following:
 1. *Know your business.* Successful businesspeople are knowledgeable about the industry in which they operate, and they know who their competitors are.
 2. *Know the basics of business management.* To *manage* a business, you need to understand the functional areas of business—accounting, finance, management, marketing, and production.
 3. *Have the proper attitude.* You should believe in what you're doing and make a strong personal commitment to it.
 4. *Get adequate funding.* Plan for the long term and work with lenders and investors to ensure that you'll have sufficient funds to get open, stay open during the start-up phase, and, ultimately, expand.
 5. *Manage your money effectively.* You need to pay attention to *cash flow*—money coming in and money going out—and you need to know how to gather the financial information that you require to run your business.
 6. *Manage your time efficiently.* You must develop time-management skills and learn how to delegate responsibility.
 7. *Know how to manage people.* You need to develop a positive working relationship with your employees, train them properly, and motivate them to provide quality goods or services.
 8. *Satisfy your customers.* Commit yourself to satisfying—or even exceeding—customer needs.
 9. *Know how to compete.* Find your niche in the marketplace, keep an eye on your competitors, and be prepared to react to changes in your business environment.

- Businesses fail for any number of reasons, but many experts agree that the vast majority of failures result from some combination of the following problems:
 1. *Bad business idea.* Like any idea, a business idea can be flawed, either in the conception or in the execution.

2. *Cash problems.* Too many new businesses are underfunded.
 3. *Managerial inexperience or incompetence.* Many new business owners have no experience in running a business, and many have limited management skills.
 4. *Lack of customer focus.* Some owners fail to make the most of a small business's advantage in providing special attention to customers.
 5. *Inability to handle growth.* When a company grows, some owners fail to delegate work or to build an organizational structure that can handle increases in volume.
- Services available to current and prospective small business owners from the SBA include assistance in developing a business plan, starting a business, obtaining financing, and managing an organization.
 - The **SBDC (Small Business Development Centers)** matches businesspeople needing advice with teams of retired executives who work as volunteers through the SCORE program.

EXERCISE

(AACSB) Analysis

1. It's the same old story: you want to start a small business but don't have much money. Go to <http://entrepreneurs.about.com/cs/businessideas/a/10startupidideas.htm> and read the article titled "Business Ideas on a Budget." Identify a few businesses that you can start for \$20 or less (that's right—\$20 or less). Select one of these business opportunities that interests you. Why did you select this business? Why does the idea interest you? What would you do to ensure that the business was a success? If you needed assistance starting up or operating your business, where could you find help, and what type of assistance would be available?
2. Why do some businesses succeed while others fail? Identify three factors that you believe to be the most critical to business success. Why did you select these factors? Identify three factors that you believe to be primarily responsible for business failures, and indicate why you selected these factors.

5.8 Cases and Problems

LEARNING ON THE WEB (AACSB)

Would You Like to Own a Sub Shop?

How would you like to own your own sandwich shop? You could start one on your own or buy one that's already in business, but an easier way might be buying a franchise from SUBWAY, the largest fast-food franchise in the world (even bigger than McDonald's). SUBWAY began in 1965 when seventeen-year-old Fred DeLuca opened a tiny sandwich shop in Bridgeport, Connecticut, hoping to put himself through college. As it turns out, his venture paid off in more ways than one. By 1974, DeLuca was franchising his business concept, and today, there are more than fifteen thousand SUBWAY franchisees in some seventy-five countries.

Go to <http://www.subway.com> to link to the SUBWAY Web site and learn more about franchise opportunities with the company. After reviewing the information provided on the company's Web site, answer the following questions:

1. What do you have to do to get a SUBWAY franchise?
2. How much would it cost to open a SUBWAY shop?
3. What training and support would you receive from SUBWAY?
4. What advantages do you see in buying a SUBWAY franchise rather than starting a business from scratch? What disadvantages do you see?

CAREER OPPORTUNITIES

Do You Want to Be an Entrepreneur?

Want to learn what it's like to be an entrepreneur? To help you decide whether life as an entrepreneur might be for you, go to <http://entrepreneurs.about.com/od/interviews/null.htm>; then link to the "Interview with Entrepreneurs" section of the About.com Web site and review the entrepreneur interviews. Select two entrepreneurs who interest you, and for each, do the following:

1. Describe the company that he or she founded.
2. Explain the reasons why he or she became an entrepreneur.
3. Explain what qualities, background, or both, prepared the individual to start a business.

After reading the interviews with these two entrepreneurs, answer the following questions:

1. What aspects of being an entrepreneur are particularly rewarding?
2. What's the downside of being an entrepreneur?
3. What challenges do entrepreneurs face?
4. Is entrepreneurship for you? Why, or why not?

ETHICS ANGLE (AACSB)

Term Papers for Sale

You and some fellow classmates are sitting around over pizza one night when someone comes up with an idea for a business. All of you have old term papers and essays lying around, and a couple of you know how to set up a Web page. What if you combine these two assets and start a business selling term papers over the Internet? Over time, you could collect or buy additional inventory from other students, and since some of you are good at research and others are good writers, you could even offer “student clients” the option of customized papers researched and written just for them. You figure that you can charge \$15 for an “off-the-rack” paper, and for customized jobs, \$10 per double-spaced page seems reasonable.

You all agree that the idea is promising, and you and a partner volunteer to put together a business plan. You have no difficulty with the section describing your proposed business: you know what your business will do, what products it will offer, who your customers will be, how your products will be sold, and where you’ll be located. So far, so good.

Let’s pause at this point to consider the following questions:

1. Does selling term papers over the Internet make business sense? Is it a good business idea?
2. Could the venture be profitable?

Let’s continue and find out how the business plan proceeds.

Now you’re ready to write your section on industry analysis and the first question you need to answer is, who are the players in the industry? To get some answers, you go online, log on to Google, and enter the search term “term papers for sale.” Much to your surprise, up pop dozens of links to companies that have beaten you to market. The first company you investigate claims to have a quarter-million papers in stock, plus a team of graduate students on hand to write papers for anyone needing specialized work.

There’s also a statement that says something like this: “Our term papers and essays are intended to help students write their own papers. They should be used for research purposes only. Students using our term papers and essays should write their own papers and cite our work.”

You realize now that you're facing not only stiff competition but an issue that, so far, you and your partners have preferred to ignore: Is the business that you have in mind even ethical? It occurs to you that you could probably find the answer to this question in at least one of the 8,484 term papers on ethics available on your competitor's Web site, but you decide that it would be more efficient to give the question some thought on your own.

At this point, then, let's pause again to identify a couple of questions that you need to ask yourself as you prepare a report of your findings for your partners:

1. Is the sole purpose of running a business to make a profit, or do you need to be concerned about what your products will be used for? Explain your reasoning.
2. Do you need to consider the ethics of what other people do with your product? Explain your reasoning.

When you report on the problem that you've uncovered, your would-be partners are pretty discouraged, some by the prospect of competition and some by the nagging ethical issue. Just as you're about to dissolve the partnership, one person speaks up: "How about selling software that lets faculty search to see if students have plagiarized material on the Web?"

"Sorry," says someone else. "It's already out there. Two students at Berkeley have software that compares papers to a hundred million Web pages."

TEAM-BUILDING SKILLS (AACSB)

Knowing how to be an effective team member is a vital lifetime skill. It will help you in your academic career, in the business world, and in nonwork activities as well. It takes time and effort to learn how to work in a team. Part of the challenge is learning how to adjust your behavior to the needs of the group. Another part is learning how to motivate members of a group. A well-functioning team allows members to combine knowledge and skills, and this reliance on diverse backgrounds and strengths often results in team decisions that are superior to those made by individuals working alone.

Are You a Team Player?

As a first step, you should do a self-assessment to evaluate whether you possess characteristics that will help you be a successful team member. You can do this by taking a “Team Player” quiz available at the Quintessential Careers Web site. Go to http://www.quintcareers.com/team_player_quiz.html to link to this quiz. You’ll get feedback that helps you identify the characteristics you need to work on if you want to improve your teamwork skills.

Working Together as a Team

The best approach to specifying appropriate behavior for team members is for the team to come up with some ground rules. Get together with three other students selected by your instructor, and establish working guidelines for your team. Prepare a team report in which you identify the following:

1. Five things that team members can do to increase the likelihood of group success
2. Five things that team members can do to jeopardize group success

THE GLOBAL VIEW (AACSB)

Global Versions of MySpace

When Andrew Mason founded Groupon in November 2008, he had no idea that he was headed for an overnight success, but two years after he set out on his entrepreneurial adventure (which, admittedly, isn't actually overnight), Groupon had more than fifty million registered users and nine million customers who had purchased at least one "daily deal" (<http://www.digital-dd.com/wp-content/uploads/2011/06/groupon-ipo-s-1.pdf>).

What's ahead for Groupon? Can its business model be exported to even more locations outside the United States? If you were in charge of global expansion for Groupon, what country would you enter next? What country would you avoid? To identify promising and not-so-promising foreign markets, go to the Groupon Wikipedia article (<http://en.wikipedia.org/wiki/Groupon>) and click on "Geographic Markets" to obtain a list of counties in which Groupon operates. Also go to http://news.bbc.co.uk/1/hi/country_profiles/default.stm to link to the Country Profiles Web site maintained by BBC News. Study the economic and political profiles of possible overseas locations, and answer the following questions:

1. Why do you think Groupon has been so successful in the United States? Cite some of the challenges that it still faces in this country.
2. If you were in charge of global expansion at Groupon, which country would you enter next? Why do you think the Groupon business concept will succeed in this country? What challenges will the company face there?
3. What country would you avoid? Why is it incompatible with the Groupon business concept?
